> Glass ceramic. Revolutionized.

> FACTS & FEATURES

- What?**
- zirconia-reinforced, high-strength glass ceramic generation
 - available as monochromatic blanks in two translucency levels (T, HT)

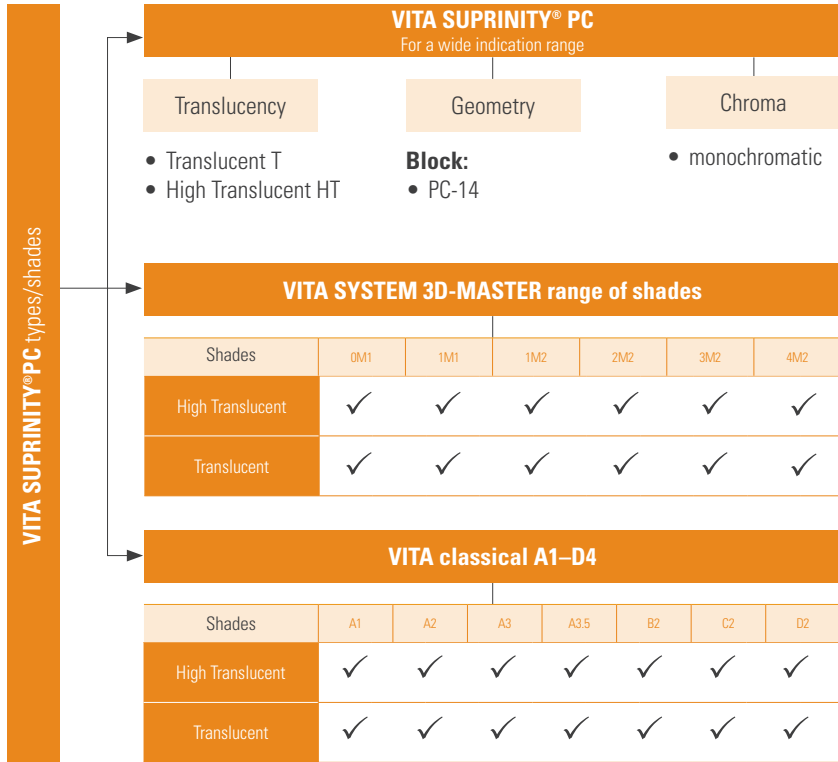

- Benefits?**
- **high reliability**
thanks to a zirconia-reinforced glass ceramic matrix
 - **precision-fit results**
thanks to material blanks with high edge stability
 - **simple processing**
thanks to good polishing characteristics and high firing stability
 - **brilliant play of shades/light**
thanks to integrated translucency, opalescence and fluorescence

- What for?**
- ideal solution for anterior and posterior crowns, superstructures on implants, as well as inlays, onlays and veneers

VITA YZ[®] ST – Super Translucent ZrO₂

VITA YZ[®] HT – High Translucent ZrO₂

VITA YZ[®] T – Translucent ZrO₂

> FACTS & FEATURES

VITA YZ[®] XT

- extra translucent zirconia. Available in non-colored, as well as monochromatic and multicolored versions

Benefit from:

- esthetic monolithic and partially veneered restorations with exceptional vibrancy, thanks to extremely high translucency
- efficient fabrication, thanks to tooth-colored, multichromatic blanks (VITA YZ XT Multicolor) with an integrated shade gradient

VITA YZ[®] XT is:

- the zirconia solution for anterior restorations with natural shade effects

> FACTS & FEATURES

VITA YZ® ST

- super translucent zirconia. Available in non-colored, as well as monochromatic and multicolored versions

Benefit from:

- high-strength, multi-unit bridge restorations with incredible lifelike appearance.
- monolithic bridge restorations that preserve natural tooth structure and partially veneered bridge restorations
- efficient fabrication, thanks to tooth-colored, multichromatic blanks (VITA YZ ST Multicolor) with an integrated shade gradient

VITA YZ® ST is:

- the zirconia solution for high-strength restorations in the posterior area

> VITA ENAMIC®

> A new definition of stability.

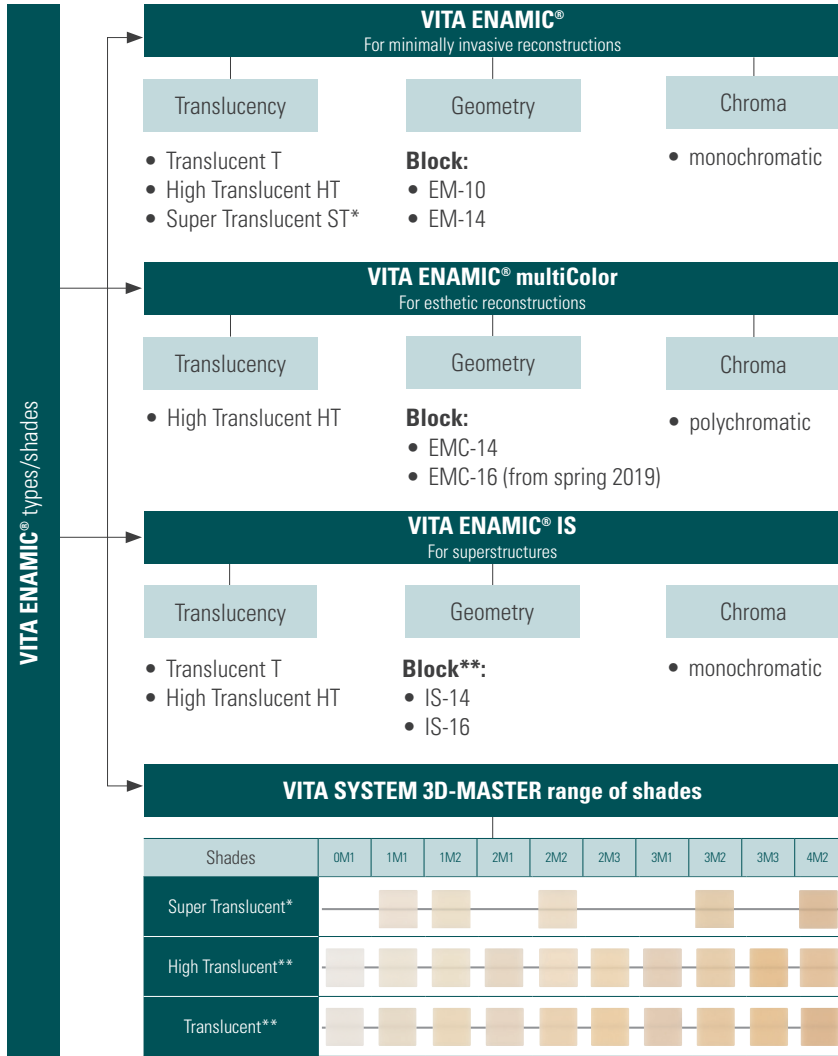

> FACTS & FEATURES

- What?**
- unique hybrid ceramic with a dual ceramic-polymer network structure
 - available as mono- and polychromatic types in up to three translucency levels (T, HT, ST)
- Benefits?**
- **fabricating durable restorations**
using a high-load capacity hybrid ceramic with absorption of masticatory forces
 - **non-/minimally invasive restorations possible**
since the elastic hybrid ceramic enables reduced wall thicknesses
 - **fabricating accurate, precise and delicate restorations**
using a hybrid material with integrated elasticity
 - **cost-effective reconstruction**
thanks to time-saving CAM fabrication and efficient polishing without any firing process
- What for?**
- ideal solution for minimally invasive, delicate and implant-supported reconstructions

> SYSTEM COMPONENTS

› PRODUCTS/ASSORTMENTS/COMPONENTS

*) Available in the EM-14 type.

**) Limited range of shades for EMC-14, EMC-16, IS-14, IS-16: available in 1M1, 1M2, 2M2, 3M2 and 4M2.

> VITABLOCS® Mark II, TriLuxe forte

> Proven a million times over.

> FACTS & FEATURES

What?

- tooth-colored feldspar ceramic for unsurpassed integration of the shade, proven a million times over
- available as monochromatic (Mark II) and polychromatic (TriLuxe forte) types

Benefits? • fabricating reliable restorations

thanks to a durable material with very good clinical long-term reliability

• highly esthetic restorations

thanks to a material with superior play of colors and light

• cost-effective reconstruction

thanks to time-saving CAM fabrication and efficient polishing without any firing process

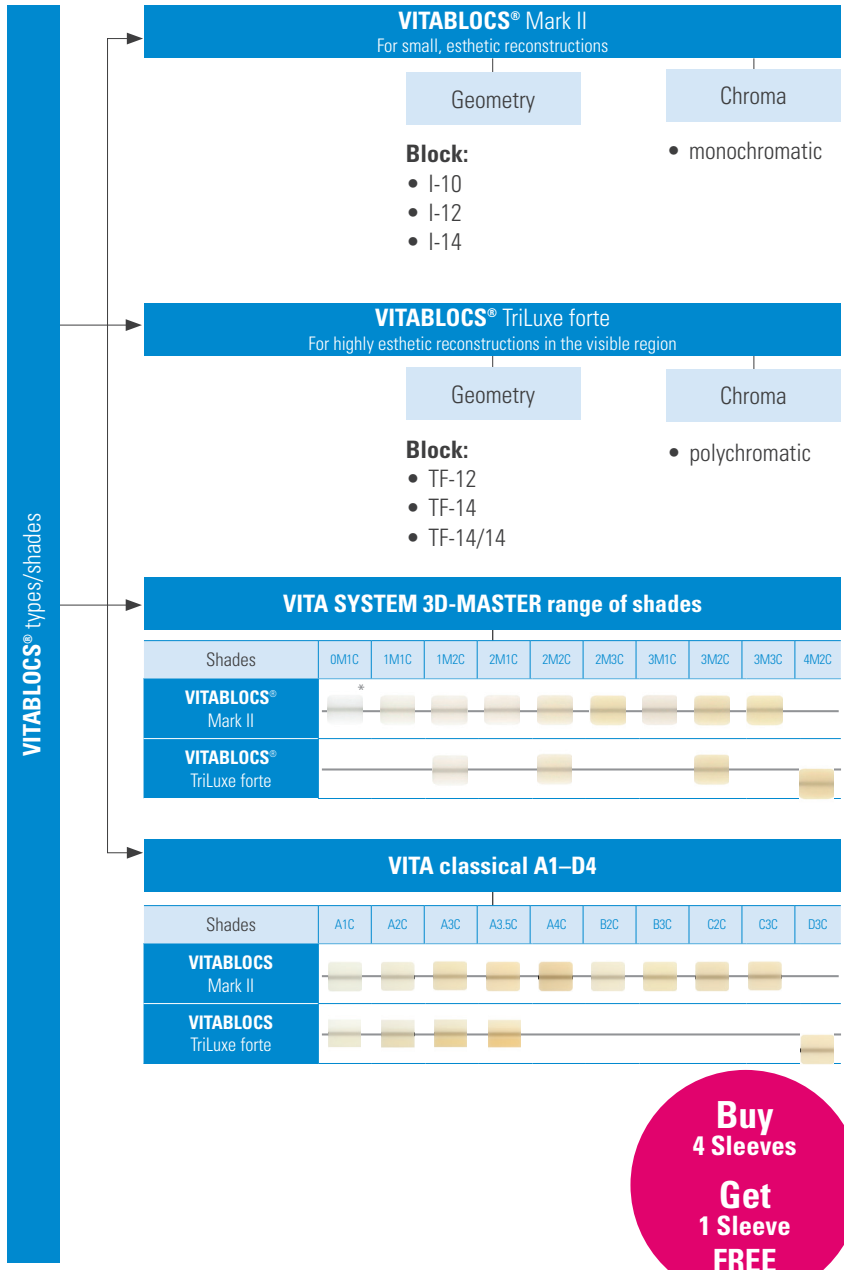

What for?

- ideal solution for esthetic reconstructions of minor defects and highly esthetic restorations in the visible region

> VITAPAN EXCELL®

> Anterior denture teeth

> FACTS & FEATURES

VITAPAN EXCELL®

- highly esthetic anterior teeth with brilliant vitality in shape, shade and play of light

Benefit from:

- perfect shape with "golden" proportions
- a brilliant play of shade and light with optimum light dynamics
- reliable shade reproduction, due to excellent shade accuracy to the shade guide

VITAPAN EXCELL® is:

- the excellent solution for highly esthetic full, partial and implant-retained dentures

VITA TEETH

> VITA VM® Ceramics

> Unlimited possibilities.

> FACTS & FEATURES

VITA VM

- Offers you all you need for natural reproduction.

Benefit from:

- Almost unlimited technical and creative options
- Superb processing characteristics, superior modelling and excellent milling and polishing properties
- Unlimited possibilities for individualization

VITA VM is:

- A veneering concept for any conceivable indication - for metal-ceramic, all-ceramic and composite restorations.

> SYSTEM COMPONENTS

> VITA VM

VITA VM 9

- For veneering zirconia substructures with a CTE of approx. 10.5.
- For individualizing VITABLOCS and VITA PM9 press ceramic pellets.

VITA VM 11

- For individualizing restorations made of zirconia-reinforced lithium silicate ceramic (ZLS), especially for VITA SUPRINITY PC.

VITA VM 13

- For veneering metal substructures made of conventional alloys with a CTE range of 13.8 - 15.2.

VITA VMK Master

- For veneering metal, VMK Master is a natural feldspar veneering ceramic for conventional bonding alloys (approx. 13.8 – 15.2 $\mu\text{m/K}$).
- Conventional, established dentin-incisal layering system.

VITA VM LC

- Light-curing microparticle composite for fixed and removable restorations for extraoral use; for veneering metal and composite substructures, individualizing VITA CAD Temp, VITA ENAMIC and VITA acrylic teeth.

VITA VM CC

- Filler-free cold-curing resin for extraoral fabrication of temporary restorations, for bonding VITA acrylic teeth for repairs.

> VITA Easyshade® V

> Precise shade determination.

> FACTS & FEATURES

- VITA Easyshade V is a digital shade measurement device for determining the shade of natural dentition and ceramic restorations precisely, quickly and safely.
- **reliable, precisely determined tooth shade information**
thanks to intelligent and objective measurement technology
- **shade determination within seconds to save time and reduce costs**
thanks to measurement results at the touch of a button
- **reliable material selection and shade reproduction**
thanks to exact and detailed tooth shade information
- **simple transmission of tooth shade/image information**
to the laboratory using software or the app

What for? • precise tooth shade determination for reliable shade reproduction for control of the shade of restorations and for documentation of the bleaching steps

> VITA SHADE GUIDES

VITA Easyshade V

VITA Easyshade V spectrophotometer

- compact spectrophotometer with advanced ergonomic design
- intuitive touch display for simple device control
- modern measurement technology to determine the base shade and shades of individual tooth areas
- result displayed in all VITA shade standards and in accordance with bleached index (according to ADA)
- Bluetooth interface for transmission of tooth shade information to PC, tablet or smartphone

VITA classical A1-D4 shade guide

VITA classical A1-D4 shade guide (basic solution)

- Basic solution for shade determination in just one step
- 16 shade sample teeth made of ceramic, manufactured in Southern Germany
- Shade samples are arranged according to the hue
- three VITA Bleached Shades samples are available as complementary products

VITA Linearguide 3D-Master shade guide

VITA Linearguide 3D-MASTER shade guide (premium solution)

- Premium solution for systematic shade determination and communication for highly esthetic restorations
- 26 shade sample teeth made of ceramic, manufactured in Southern Germany
- systematically arranged shade samples according to lightness, chroma and hue
- includes three VITA Bleached Shade samples

VITA POLISHING

> VITA ZYRCOMAT® 6000 MS

> Sintering unit

> FACTS & FEATURES

VITA ZYRCOMAT® 6000 MS

- manufactured using the highest quality standards and equipped with modern hardware and software

Benefit from:

- homogenous distribution of heat inside the sintering chamber
- fully automatic calibration with guaranteed temperature accuracy
- sintering of up to 80 units on two levels
- high-speed sintering in 80 min

VITA ZYRCOMAT® 6000 MS is:

- a sintering unit completely developed and manufactured in Germany for all dental ceramic zirconia framework materials

> SYSTEM COMPONENTS

> VITA FURNACES

VITA VACUMAT 6000 M/MP

- VITA VACUMAT 6000 is a fully automatic, microprocessor-controlled firing unit for all dental ceramic firing requirements.
- VITA VACUMAT 6000 MP is a combipress with all of the advantages of a modern firing unit and press furnace with a compact design that sets new standards, offering all of the programs and functions of the VACUMAT 6000.

VITA ZYRCOMAT 6000 MS

- VITA ZYRCOMAT 6000 MS is a sintering unit completely developed and manufactured in Germany for all dental ceramic zirconia framework materials
- Sintering of up to 80 units on two levels
- High-speed sintering in 80 minutes

VITA SMART.FIRE

- VITA SMART.FIRE is a firing unit developed specifically for dental practices for the crystallization, glaze, stain and corrective firing of all common chairside materials.
- The firing unit is controlled using a touch control unit. Optimally, customized material-specific programs are already pre-installed for simple firing.
- The VITA SMART.FIRE System contains the firing unit, the control unit and the integrated accessory set.

> VITA POLISHING TOOLS

> Efficient two-stage polishing systems.

FACTS & FEATURES

- What?**
- Polishing systems for reliable, efficient and material-specific surface treatment of restorations made of glass and hybrid ceramics (VITA SUPRINITY and VITA ENAMIC)
 - available for intra- (clinical) and extraoral (technical) use
- Benefits?**
- **high-gloss, homogeneous surfaces**
thanks to a wide range of instruments with exact concentricity and matched grain size
 - **time-saving and simple handling**
through efficient materials without the use of polishing paste
 - **safe clinical use**
thanks to autoclavable clinical polishing instruments
 - **gentle and careful processing**
thanks to abrasive particles and grain sizes matched to the specific materials
- What for?**
- two-stage VITA ENAMIC- or VITA SUPRINITY polishing systems for efficient pre- and high-gloss polishing of glass and hybrid ceramics

POLISHING SETS

VITA ENAMIC POLISHING SET Clinical

- two-stage polishing system, includes a total of six instruments for the contra-angle
- includes three instruments each for pre- and high-gloss polishing

VITA ENAMIC POLISHING SET Technical

- two-stage polishing system, includes a total of eight instruments for the handpiece
- includes four instruments each for pre- and high-gloss polishing

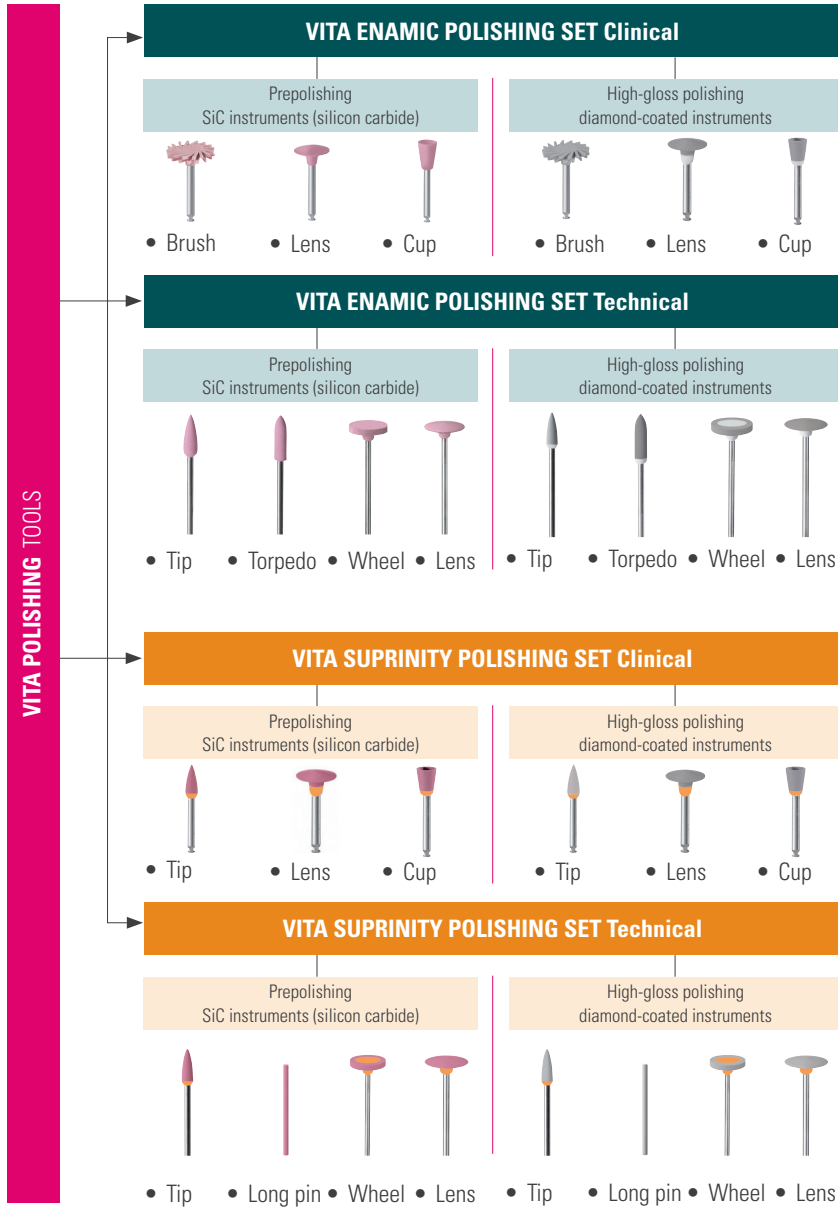

VITA SUPRINITY POLISHING SET Clinical

- two-stage polishing system, includes a total of six instruments for the contra-angle
- Includes three instruments each for pre- and high-gloss polishing

VITA SUPRINITY POLISHING SET Technical

- two-stage polishing system, includes a total of eight instruments for the handpiece
